REMARKS

Claims 6-14 are objected to and rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for the reasons noted in the official action. Claims 10 and 13 are canceled, without prejudice or disclaimer of the subject matter therein, while the remaining objected to and rejected claims are accordingly amended, by the above claim amendments, and the presently pending claims are now believed to particularly point out and distinctly claim the subject matter regarded as the invention, thereby overcoming all of the raised § 112, second paragraph, rejections. The entered claim amendments are directed solely at overcoming the raised indefiniteness rejection(s) and are not directed at distinguishing the present invention from the art of record in this case.

Next, claims 6 and 8 are rejected, under 35 U.S.C. § 102, as being anticipated by Muller et al. '364. The Applicant acknowledges and respectfully traverses the raised anticipatory rejection in view of the following remarks.

The Applicant thanks the Examiner for indicating that: (a) claims 9, 11, 12 and 14 are allowable; (b) claim 7 is objected to as being dependent upon a rejected base claim but would be allowable if rewritten in independent form to include all of the limitations of the base claim and any intervening claim(s); and (3) claims 10 and 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph. In accordance with this indication, the allowable subject matter of claim 7 is incorporated into rejected claim 6 and that independent claim is now believed to be allowable. As claim 8 depends from independent claim 6, that dependent claim is believed to be allowable as well.

Allowed claims 9 and 12 are slightly revised but such minor amendment to both of those claims is not believed to affect, in any way, the indicated allowability of either of those claims.

Lastly, new claims 15-21 are entered in this application and each of those claims depend from either independent claims 6, 9 or 12 which, as noted above, are believed to be allowable. According, these new dependent claims are also believed to be allowable for at least the same reasons. However, if any further amendment to this application is believed necessary to advance prosecution and place this case completely in allowable form, the Examiner is courteously solicited to contact the undersigned representative of the Applicant to discuss the same.

In view of the above claim cancellations and amendments, the Applicant respectfully submits that further comments concerning the applied prior art is not believed necessary. The Applicant also notes the remaining prior art cited in the official action. As none of that additional art is applied by the Examiner against the claims of this application, the Applicant is not providing any comments concerning that art as well.

In view of the above amendments and remarks, it is respectfully submitted that all of the raised rejection(s) should be withdrawn at this time. If the Examiner disagrees with the Applicant's view concerning the withdrawal of the outstanding rejection(s) or applicability of the Muller et al. '364 references, the Applicant respectfully requests the Examiner to indicate the specific passage or passages, or the drawing or drawings, which contain the necessary teaching, suggestion and/or disclosure required by case law. As such teaching, suggestion and/or disclosure is not present in the applied references, the raised rejection should be withdrawn at this time. Alternatively, if the Examiner is relying on his/her expertise in this field, the Applicant respectfully requests the Examiner to enter an affidavit substantiating the Examiner's position so that suitable contradictory evidence can be entered in this case by the Applicant.
